IEG PI NOTICE

No. 7-76

TITLE/SIGNIFICANCE:

Acquisition Radar for New Strategic Defensive Missile System at Sary-Shagan Missile Test Center.

COMMENT: The antenna assembly consists of a cut parabolic reflector which is bisected by a probable feed device and mounted on top of a transportable electronics tower. The tower is erected to a vertical position by hydraulic lifting arms and is stabilized by outriggers that swing from the transporter body. In the mobile mode, the tower is folded down horizontally on the bed of a [redacted] semitrailer and towed by a MA [redacted] prime mover. (Artist's concept on back)
